

MALCOLM JOSUA GALLEGOS BAUTISTA

JAVA SOFTWARE ENGINEER | SPRING BOOT | MICROSERVICES | DISTRIBUTED SYSTEMS

Mexico | +52 998 107 1417 | MalcolmJGB@hotmail.com | LinkedIn: [MalcolmJGB](#) | GitHub: [MalcolmJGB](#)

Spanish (Native) | English (B2 - Professional Working Proficiency) | German (Basic)

PROFESSIONAL PROFILE

Java Software Engineer with 6+ years of experience in technology, including 3+ years at IBM Consulting delivering Java/Spring Boot solutions through client engagements for enterprise banking and insurance platforms. Contributed across system design, development, modernization, automated testing, release coordination, and production support for 20+ microservices used by thousands of users. Experienced with REST and SOAP APIs, Kafka-based integrations, relational databases, Kubernetes, CI/CD, observability, performance analysis, and Java 8-to-17/21 upgrades. Reviews code, mentors less-experienced engineers, translates requirements into technical plans, and communicates delivery risks and solutions to technical and client stakeholders.

CORE SKILLS

- **Programming:** Java (8, 17, 21), C, SQL, Python
- **Backend & Integration:** Spring Boot, Microservices, REST APIs, SOAP, Apache Kafka, JPA, JDBC, Lombok
- **Architecture & Reliability:** System Design, Distributed Systems, Event-Driven Architecture, API Design, Performance Analysis, Production Troubleshooting, Root-Cause Analysis
- **Engineering Practices:** Clean Code, Code Reviews, Unit & Integration Testing, CI/CD, Release Management, Agile/Scrum
- **Data, Cloud & Delivery:** PostgreSQL, MySQL, AWS (basic working experience), Kubernetes, Docker, Podman, Jenkins, GitLab CI, Argo CD, Git
- **Observability & Tools:** Grafana, Prometheus, Dynatrace, SonarQube, Postman, SoapUI, Jira, Confluence

PROFESSIONAL EXPERIENCE

IBM - Consulting | Software Engineer

Sep 2022 - Mar 2026

CLIENT ENGAGEMENTS AT IBM | BANKING & INSURANCE

USAA | API Migration - Software Engineer

Aug 2025 - Mar 2026

- Migrated and validated legacy APIs during a large-scale platform modernization, preserving functional behavior, integration contracts, and release readiness across dependent systems.
- Implemented backend services and migration logic in Java and Spring Boot, standardizing API error handling and response structures.
- Created and maintained JUnit unit and integration tests to reduce regression risk during API cutover and release validation.
- Used Jenkins, GitLab CI, and Argo CD pipelines to build, deploy, and validate services; analyzed Kubernetes pod and application logs to resolve runtime issues blocking releases.

Scotiabank | Business Banking Platform - Software Engineer

Sep 2023 - May 2025

- Designed, developed, migrated, and maintained 20+ Java/Spring Boot microservices supporting business-banking workflows used by thousands of users within a four-developer Agile team.
- Contributed to system design and architecture improvements for services with performance and maintainability issues, helping reduce response times and simplify service interactions.
- Upgraded legacy services from Java 8 to Java 17/21, refactoring code while preserving production stability, compatibility, and release continuity.
- Implemented synchronous and asynchronous integrations using REST APIs, SOAP services, and Apache Kafka.
- Performed root-cause analysis for production incidents using Grafana, Prometheus, and Dynatrace, supporting reliable resolution of critical service issues.
- Built and maintained JUnit unit and integration test suites, supporting automated validation and reducing regression risk across releases.
- Reviewed pull requests and mentored less-experienced developers on architecture decisions, clean code, maintainability, and team engineering standards.
- Translated requirements and user stories into technical tasks, estimates, and implementation approaches through refinement and sprint planning.
- Communicated progress, blockers, delivery risks, and proposed solutions to technical leads and client stakeholders while coordinating releases across Development, QA, and DevOps teams.

USAA | Financials - Java Web Developer

Sep 2022 - Sep 2023

- Developed Java 8/Spring Boot microservices for insurance-related financial processes and enterprise workflows.
- Produced and consumed Kafka events and built REST APIs integrated with event-driven processing flows.
- Accessed and updated relational data using JPA and JDBC, supporting PostgreSQL and MySQL environments.
- Designed and maintained JUnit unit and integration tests and contributed to Agile planning, daily coordination, and delivery activities.

Syntax - Virtualization and Cloud Computing Engineer

Jan 2020 - Sep 2022

- Provisioned and migrated virtual machines, installed VMware hypervisors, configured virtual networks, installed Windows/Linux operating systems, and managed partitions and storage.
- Resolved high-priority infrastructure incidents through ServiceNow and served in secondary on-call coverage, strengthening operational discipline and production support skills.

EDUCATION

Tecnologico de Monterrey - B.S. in Mechatronics Engineering
Mexico

2020

CERTIFICATIONS

- Microsoft Certified: Azure Fundamentals (2023)
- Cisco Unified Computing System - Introductory (2022)
